SAFETY INSTRUCTIONS AND WARNINGS

Symbols

=	WARNING! Notices apply to hazardous or unsafe practices, which could result in serious bodily harm.
=	CAUTION! Notices apply to hazardous or unsafe practices, which could result in minor personal injury or property damage.
=	Highlights procedures which will assist the operator in understanding the information contained in this manual.

Please read and understand these installation procedures entirely before assembling the Easytrack FS[™]. Information in this manual is important to the proper operation of this equipment. It will help protect you from possible injury and ensure that the equipment will perform to your satisfaction.

EASYTRACK FS[™] SPECIFICATIONS

ALWAYS KEEP THESE INSTRUCTIONS with the Easytrack FS™.

FAILURE TO MEET REQUIREMENTS LISTED BELOW COULD RESULT IN SERIOUS BODILY HARM.

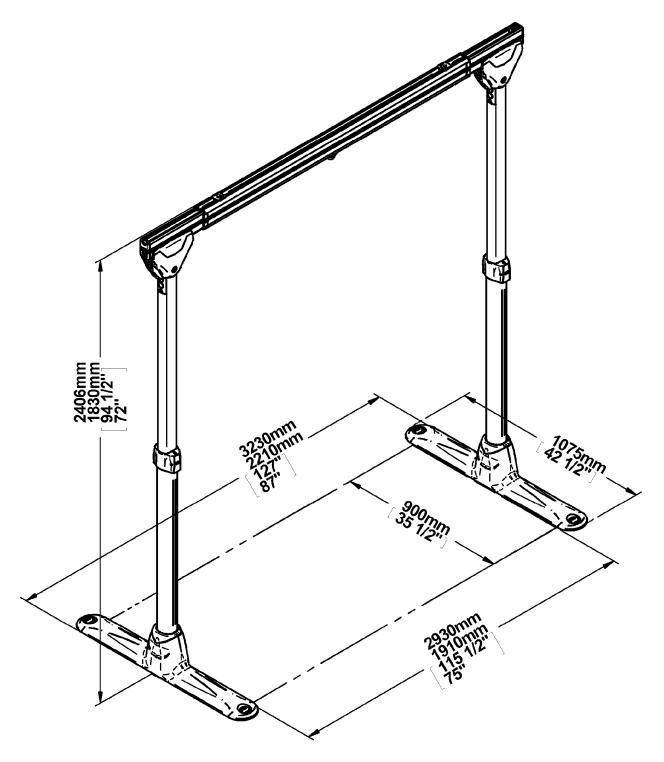

- Maintenance MUST be performed **ONLY** by qualified personnel. This equipment should never be used by a patient on their own.
- The Easytrack FS[™] System and its accessories are intended to be used as an assistive device for transferring a person between the posts.
- The Easytrack FS[™] is only to be used with BHM portable lifts.
- Ensure floor is clear of any dust, grease, water or any foreign substances prior to the transferring of a patient.
- If you are unsure of the strength or stability of your floor, do not assemble the equipment.
- Floor must be level. Do not install on a sloped floor.
- Ensure posts are straight prior to use with a patient.
- Do not drop product, it may cause breakage.
- Do not submerge in water.
- Do not attempt to over-extend the rail past the locking point.
- Protect the Easytrack FS[™] and its accessories during transport.
- Prior to each use of the equipment, complete a visual inspection.
- A monthly maintenance inspection must be done in order to assure the good operating condition of the Easytrack FS[™].

When the Easytrack FS[™] is in use

- Do not bump the posts This might cause unit to become unstable. If posts are bumped, reassemble Easytrack FS[™] system to ensure the posts are straight.
- If you use a power wheel chair use extreme care bumping posts may cause unit to become unstable. If posts are bumped, reinstall the Easytrack FS[™] system to ensure the posts are straight.
- Do not lean against posts.
- Do not use the Easytrack FS[™] system as a swing.
- Do not allow the patient to swing in any direction while being lifted.

EASYTRACK FS[™] SPECIFICATIONS

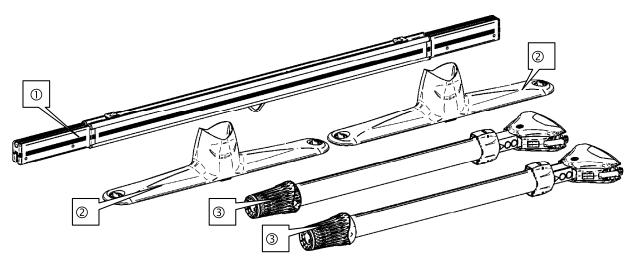

SPECIFICATIONS

MAX. CAPACITY: 200 kg (440 lbs)

EASY TRACK FS

What's included?

	Legend	Parts #
	Easytrack FS [™] extendable rail with trolley– 1 piece	700.17250
2	Easytrack FS [™] base – 2 pieces	700.17100
3	Easytrack FS [™] post - 2 pieces	700.17000

PRIOR TO THE INSTALLATION

WARNING : Read the section "Safety instructions and warnings" before attempting to assemble the Easytrack FS[™] system.

- Survey the room, where you plan to install the Easytrack FS[™] system.
- Make sure the room meets the requirements specified below.
- Use the measurements below to determine the best place to put the Easytrack FS[™] system :

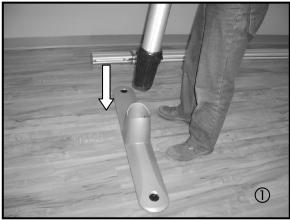

Step 1. Post to Base Assembly

Note: The assembly can be performed by one person

- 1. Remove all parts from the boxes. Before assembling make sure that all parts are present and in good condition.
- 2. Layout the bases on a level and clean floor at the desired distance.
- 3. Insert the posts in the bases. The design of the base will ensure the post lines up in the correct position.

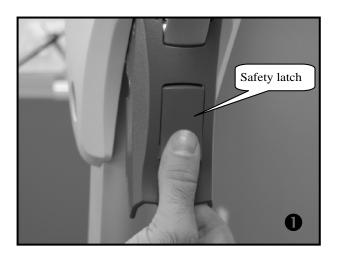

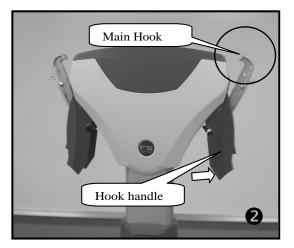

EASY TRACK FS

Step 2. Installation of the rail

- 1. Prior to the installation of the rail, unlock the hook handle by pressing on the safety latch and pulling outward (located on the blue colored component on the side of the post head).
- Gently pull out the handle until the red stripe of the main rail hook mechanism is visible.

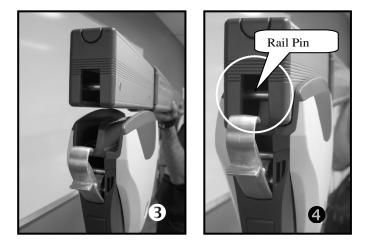

3. Insert the rail in place on top of both posts. €

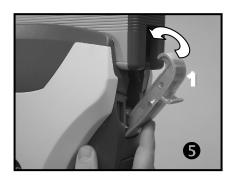

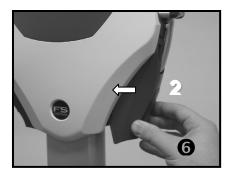

When placing the rail on the post, extend the inner rail 3 inches out from the main outer rail in order to allow enough space for the safety latch to properly engage the rail.

4. Secure both ends of the rail by engaging the main hooks over the rail pins.

5. Lock the rail to the post by closing the hook handle while pushing the main hook over the rail pin. The red stripe on the hook handle should no longer be visible. You should feel a slight tension when closing the hook handle. I I

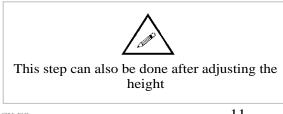

View of the rail when properly installed and locked in place

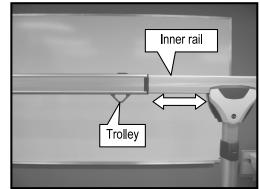

Step 3. Rail width adjustment

- 1. To adjust the rail width, pull the inner rail away from the main outer rail until the desired width is achieved.
- 2. Trolley position should be as shown on picture. If not, make sure that inner rail is extended. Trolley will become free of its transportation slot. If it does not, shake the trolley lightly left and right to release it. Trolley should move freely at this point.

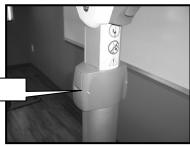

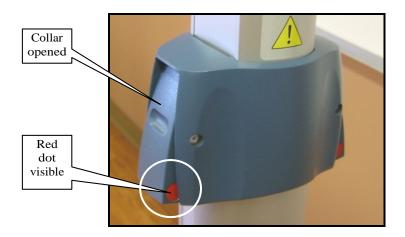

Step 4. Height adjustment

1. The height adjustment of the posts is accomplished by starting with the blue locking collar clamp located in the centre of each post.

Blue locking collar clamp

2. Pull on the lower portions of both sides of each locking collar to release the collar mechanisms and allow the inside section of the post to extend upwards. When the collars are in the open position red dots are visible.

3. Position yourself in the center of the rail between the two posts and gently push upwards until the desired height is achieved.

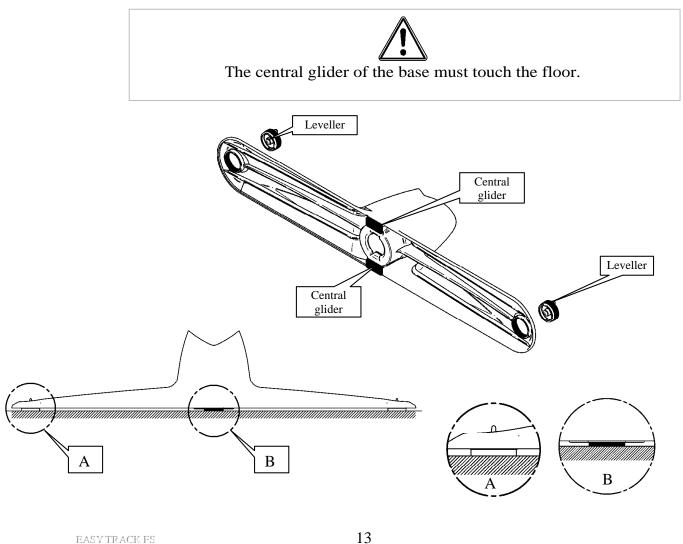

4. To ensure the rail is level use the measurement reference marks on the front of each post.

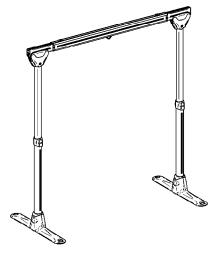

5. Re-lock the clamping collars on both posts to secure the assembly. When the collars are in the locked position red dots are no longer visible.

6. Fine tune the level of each base using the two blue floor levellers located at each ends of both bases.

7. Your Easytrack FS^{TM} is now ready to use with your BHM portable lift (*not included with this kit.*)

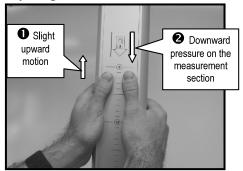

ENSURE THERE IS NOBODY IN THE LIFT AND REMOVE LIFT FROM THE TROLLEY BEFORE ADJUSTING OR DISASSEMBLING THE EASYTRACK FS[™]SYSTEM.

To disassemble the Easy track FS^{TM} reverse the assembly sequence.

- 1. Remove the portable lift from the rail trolley.
- 2. Unlock the clamping collars on both posts (See "Height adjustment" section). The posts are retracted by first releasing the pressure on the internal lock mechanism using a slightly upwards motion on the post, and then applying downward pressure to the section of the post where the measurement reference marks are located.

- 3. Remove rail from posts. To do so, unlock the safety latches in order to release the main hook from the rail pin. (See the "Installation of the rail" sections).
- 4. Collapse the extended rail (See "Rail width adjustment" section).

EASY TRACK FS

MAINTENANCE

FAILURE TO FOLLOW MAINTENANCE INSTRUCTIONS COULD RESULT IN INJURY OR DAMAGE.

PERIODIC INSPECTION SHOULD BE PERFORMED BY A PERSON WHO IS PROPERLY QUALIFIED AND WELL ACQUAINTED WITH THE DESIGN, USE AND CARE OF THE EASYTRACK FS™ SYSTEM. CONTACT YOUR LOCAL DEALER/DISTRIBUTOR.

INSPECTION SHOULD BE CARRIED OUT ROUTINELY. ANY DAMAGE THAT HAS LEAD TO CORRECTIVE ACTIONS SHOULD BE NOTED, SIGNED AND DATED BY THE INSPECTOR. DEFECTS AND RESULTING ACTIONS SHOULD BE REPORTED IN WRITING TO YOUR SUPPLIER.

EASYTRACK FS™ VISUAL INSPECTION

Conduct a visual inspection before each use of the equipment

- 1. Make sure posts are straight. If they do not appear straight, verify with a level. If posts are not straight, remove rail and re-install posts (refer to assembly instructions).
- 2. Make sure rail is secured in place. Press up on the rail to make sure that the rail is locked onto the post.
- 3. Make sure there is no visual damage. If so, DO NOT USE THE EASYTRACK FS[™] SYSTEM.
- 4. Make sure that bases are properly adjusted (see assembly instructions).

MAINTENANCE

MONTHLY MAINTENANCE

- Clean inside rail with a damp cloth to ensure there is no dust or grease build-up.
- Check to ensure all original parts are present. If any parts are missing they should be replaced BEFORE USING THE EASYTRACK FS[™] SYSTEM.
- Make sure that the trolley in the rail moves freely. It may need to be cleaned or replaced on occasion.
- Examine all joints and pieces for wear and fatigue. Replace any part that looks damaged or worn.
- Document inspections and repairs.

IF EQUIPMENT IS MOVED ON A REGULAR BASIS:

- Make sure all components are accounted for (see "What's included" section).
- Check "Safety instructions and warnings" and "Assembly instructions" sections before re-installing the Easytrack FS[™] System.
- Make sure the bases are clear of any debris and are not damaged. If they appear to be damaged, replace bases.
- Make sure there is no debris in the base post sockets.
- Look for signs of wear or breakage on all parts. Replace any parts that appear worn or damaged.

FOLLOW GUIDELINES IN YOUR PORTABLE LIFT MANUAL FOR OPERATING AND MAINTENANCE PROCEDURES OF THE LIFT.

TROUBLESHOOTING

TROUBLESHOOTING

PROBLEM	CORRECTION
Trolley moves substantially on its own when the Easytrack system is fully assembled.	Is the rail levelled? Is the floor levelled? Is the rail secured to the posts? Press up on the rail to make sure that it is latched onto posts.
Extendable rail comes completely apart during assembly.	 Rail has been extended too quickly/ forcefully. Rail was pulled past the locking device. Check locking device inside rail (top of rail above the trolley) to make sure it is not damaged. Replace the trolley if damaged. See "Easytrack FS ™" system content. Put rail back together at a slight angle and slide together. Slowly extend rail out again to ensure locking device clicks into place. Slowly compress the rail again.
Trolley does not roll in rail smoothly.	 Is rail clean? Clean rail with damp cloth. Is trolley centered in rail? Re-center trolley. Is the trolley damaged? Replace trolley
Posts and bases rock back and forth	 Check integrity of the floor. Are the leveller's properly adjusted? Are the posts properly inserted in the base? Are the collar clamps closed?
It is impossible to retract posts	 Did you release the collar clamps? Did you follow the disassembling instructions? Did you remove lift from trolley?
The trolley does not move	 Did you extend the inner rail in order to release it from the rail slot (transportation)? Is there debris on the rail?
Main hook does not engage on rail pin	 Is there debris in the rail? Is the rail well seated on the posts?

WARRANTY

WARRANTY

This warranty is extended only to the original purchaser/user of BHM products.

BHM Medical Inc. warrants its products to be free from defects in material under normal use and service, within the periods stated below from the date of purchase. If within such warranty period any such product shall be proven to be defective, such product shall be repaired or replaced at BHM Medical's option. This warranty does not include any labor or shipping charges incurred in replacement part installation or repair of any such product. BHM Medical's sole obligation and your exclusive remedy under this warranty shall be limited to such repair and/or replacement.

For warranty service, please contact the dealer from whom you purchased the BHM Medical product. [In the event that you do not receive satisfactory warranty service, please contact BHM Medical – 1 800 868-0441].

Do not return products to our factory without prior authorization. BHM Medical will issue a Return Merchandise Authorization (RMA) Number. C.O.D. shipments will be refused; all shipments to BHM Medical must be prepaid. For this warranty to be valid, the purchaser must present its original proof of purchase at the moment of the claim. The defective unit, assembly or part must be returned to BHM Medical for inspection. The part or components repaired or replaced are guaranteed for the remaining period of the initial warranty.

Limitations and Exclusions:

The warranty above does not apply to serial numbered products if the serial number has been removed or defaced.

No warranty claim shall apply where the product or any other part thereof has been altered, varied, modified, or damaged; either accidentally or through improper or negligent use and storage. Warranty does not apply to products modified without BHM Medical's express written consent (including but not limited to products modified with unauthorized parts or attachments), products damaged by reason of repairs made to any component without the specific consent of BHM Medical, or to products damaged by circumstances beyond BHM Medical's control. BHM Medical will solely determine evaluation of warranty claim. The warranty does not apply to problems arising from normal wear or failure to adhere to the instructions in this manual. BHM Medical Inc. slings are void of warranty if not laundered as per instructions on the Sling Label.

BHM Medical Inc. shall not be liable for damages, losses or inconveniences caused by a carrier.

This warranty replaces any other warranty expressed or implicit and constitutes BHM Medical Inc.'s only obligation towards the purchaser. BHM Medical shall not be liable for any consequential or incidental damages whatsoever.
