

HybridLX Rollator Transport Chair

The HybridLX is an innovative rollator that combines the function of a wheeled walker and a transport chair into one lightweight design. Keeping the patient's desire for independence and comfort in mind, the HybridLX is designed with secure handgrips, a comfortable and wide seat and backrest, and the effortless design to transition from a rollator to a transport chair.

Other Features Include:

- Lightweight frame – durable, aluminum frame weighs only 22 lbs (this includes footrests) making it easier for users to move about freely
- Hybrid concept – designed to be used primarily as a rollator while easily transforming into a transport chair with removable footrests (adjustable in length) when user needs a short rest
- Ultra-Compact design – easy to assemble without the need for tools and folds effortlessly for convenient transport and storage
- Easy-to-use handbrakes – allow for short and longer period braking when used as rollator and transport chair (user must be accompanied when using as a transport chair)
- Flexible, soft polyester backrest and 18" wide mesh seat with pull up strap for easy folding provides comfort for user
- Large 8" wheels for easy rolling indoor and outdoor on rough surfaces
- Complete with storage pouch for personal items
- Available in attractive, contemporary colors: Titanium and Majestic Blue
- Designed to meet the requirements of HCPCS Codes: E0143 + E0156.
- Warranty: 3 years on Frame
